

ADDED FEATURES FOR YOUR CONVENIENCE

The 9100 is a machine for the future and has been designed with a number of features like RSS feed, weather forecast and online connectivity.

PAYMENT SYSTEMS

Payment system or freevend, that is your choice. The machine supports coin or cashless systems at the same time.

EASY MAINTENANCE

The smart design of the machine, the colour-coding of internal parts and the intuitive interface reduce maintenance time, optimize operational costs and improve customer satisfaction.

9100

WITTENBORG
designed to last

THE COFFEE YOU WANT

WHENEVER YOU NEED IT – WHEREVER YOU ARE

9100

USER-FRIENDLY TOUCH SCREEN

Just put your finger to the 10" HD touch screen and be guided through the many delicious drink choices.

COFFEE EXACTLY TO YOUR TASTE

Espresso or fresh brew coffee, cappuccino, cafe latte or a creamy hot chocolate - made just they way you like, simply by the touch of your finger.

FLEXIBLE CANISTER

The flexible canister may offer two blends of coffee at the same time, or even whole beans and roast and ground, to suit different preferences. The canister contains up to 4 kg of coffee.

ELEGANT DESIGN

LED lights frame the Scandinavian elegance of the aluminum facia and help ensure that the machine is both user-friendly and energy efficient.

The 10" touch screen - 1280 x 800 - offers a visual guide, making choices easy. The design and layout of the screen can also be fully customized to suit any environment.

The user-friendly interface lets you prepare a drink just the way you like it, allowing you to make changes to the strength and amount of ingredients - you can even save your personalized drink in the layout.

The flexible canister can offer two blends of coffee or even roast and ground and whole beans at the same time.

WiFi and Bluetooth enabled on-screen information and entertainment.

Separate delivery points: Coffee, chocolate, and mixed drinks on the left, and water on the right. This prevents any cross contamination into the water.

A light path in the cup area helps ensure that the cup is placed in the correct position. Cup sensors recognize cups or mugs made from a variety of different material including paper, plastic, glass and porcelain.

The spacious delivery area with adjustable cup holders allows you to fill coffee pots or thermo jugs.

LED lights frame the cup area which enhance the overall visual appearance and user experience.
